csusb.edu/writing-center/graduate-writing-center

Location:

College of Education - CE 310

Email:

writingcenter@csusb.edu

Phone:

909-537-3127

Reference List Example: Citing AI

Author of algorithm (2022). *ChatGPT (Version 3.5.0)* [Large language model].
source: where you can access the model
<https://chat.openai.com/chat>

In-text Citation Example

When prompted with “How does the Sapir-Whorf hypothesis apply to writers using AI?” ChatGPT produced, “If the AI has particular biases or tendencies in its language output, writers may unknowingly adopt or be influenced by these patterns in their own writing” (OpenAI, 2023; see Appendix B for the full transcript). While it accurately captures concerns around the adoption and influence of unrecognized biases, OpenAI’s (2023) “if” framing of such biases as being possible rather than necessary undermines the quality of its advice: all language is inflected with bias, including the sources of ChatGPT’s training and clearly, its own advice.

Quick Style Tips

- Working with AI within your writing process must be disclosed and cited.
- In your methods, specify how, where, and the extent to which you worked with AI.
- Writing for scholarly publication in APA must include the full output of material produced by AI within a section for supplementary materials/appendices.
- Best practices, requirements, and policies regarding work with AI are developing and changing, so **keep the full output** of all work with AI and diligently and transparently **document how it was produced and integrated within your writing process**.
